

Can't visit Israel? School cancelled? We've got you covered!

The **Biblical Museum of Natural History** is offering tours in the NEW museum building exclusively for a very special type of person: those who can't come!

Our live online 50-minute programs are perfect for synagogues, schools and other groups who are unable to physically visit. All you need is an internet connection! We will give you interactive tours of museum exhibits, during which you can ask questions. It's the next best thing to actually visiting!

Due to the expanded size of the new museum, and the necessity to keep online tours relatively brief at 50 minutes, it is impossible to cover the entire museum in a single session! We offer a "Basic Tour" which zooms around the entire museum, giving a taste of everything, and is suitable for very young audiences with limited attention spans; and seven in-depth tours, each of which takes place in a different hall:

The Wonders of Creation

Exploring the marvels of nature, with a particular focus on those creatures which are highlighted in Scripture for their wondrous characteristics. Featuring our largest and smallest exhibits!

The Animal World of the Bible

What is Biblical Natural History? Which animals are Biblical, and which are not? Featuring fascinating encounters with many creatures!

Beasts & Behemoths

A presentation on the identities and symbolism of various predators and other wild animals in Scripture, including lions, hippos, and more!

The World of Birds

The symbolism of eagles, storks, quails, falcons, and other birds in the Bible and Jewish history - with live encounters!

Reptiles and Creepy Crawlies

A survey of the identities and natures of the reptiles and small mammals that are listed in the Bible. This presentation also shows how creatures that appear so lowly can be a source of tremendous inspiration. Featuring many live specimens!

The Laws of Kosher Creatures

The Biblical laws of kosher mammals, birds, eggs, fishes, and insects, reveal fascinating insights into zoology and life in ancient Israel. Featuring astonishing examples from throughout the animal kingdom!

Horns and Shofars

Which horns can be made into shofars, and why? This presentation features the world's largest collection of shofars from different species!

Price for Institutions: \$400 for synagogues/adult groups; \$250 for children's schools.

Individuals/Families: Sign up for our weekly Zoom series at www.BiblicalNaturalHistory.org/members
